

**OUTSIDE PLANT DAMAGE  
RECOVERY**

# PHOENIX<sup>®</sup> Loss Control

## THE LEADER IN OUTSIDE PLANT DAMAGE RECOVERY

### Do you suffer from third party damage to your cable, fiber, or gas and electric networks?

- For over 15 years, Phoenix Loss Control (“PLC”) has been the leader in third party damage claim recovery
- We help some of largest companies in the cable, telecoms, and utilities industries recover the costs of third-party damages to their outside plant infrastructure (ex. underground fiber networks)
- We will (i) investigate the cause of damage, (ii) determine the responsible party, (iii) calculate the total costs to repair your damaged facilities, and (iv) invoice and secure recovery
- We have recovered 10s of millions of dollars in losses for our clients and we can do the same for you

### Why Phoenix

- **End to end service.** We completely outsource the recovery process. From investigating the cause of damage all the way to litigation, we handle everything from a to z.
- **No up front or fixed costs.** Our fee structure is entirely contingency based: we only get paid if you recover your losses.
- **Easy to set up.** Once you sign with Phoenix, you can begin sending claims to us in as little as 1-2 weeks.
- **No disruption to your business.** We operate with very little involvement from our clients, letting you focus on what matters.
- **Unmatched experience.** PLC invented the third-party damage recovery industry. We have been doing it for longer than anyone.

### Our Process

- A client reports a damage to PLC by phone or through our mobile app
- Phoenix sends an investigator onsite to determine the cause of damage and responsible party
- We calculate our clients' damages and invoice the third party
- Our recovery agents pursue payment (including, if necessary, litigation)
- We collect and remit payment to our clients
